Objective 1

Develop and empower an Upper Iowa River Watershed Resiliency Network that fosters partnerships between agencies and organizations, considers all aspects of flood prevention and recovery, and maximizes local, state and federal resources.

Objective 1

The first objective is to "Develop and empower an UIR Watershed Resiliency Network that fosters partnerships between agencies and organizations, considers all aspects of flood prevention and recovery, and maximizes

local, state and federal resources."

Strategy 1: Encourage multi-agency/ organization information sharing

- **Action 1:** Facilitate annual stakeholder meeting (Including EMS, SWCD's, CCB, Engineer's Offices, Sanitarian Offices, NRCS, City Park and Rec, Iowa DNR, Wastewater Management Offices, Etc.)
- **Action 2:** Encourage agencies, organizations, departments and other partners to link online media and social media resources
- **Action 3:** Encourage local agencies and departments to refer to this plan

Strategy 1: Encourage multi-agency/ organization information sharing

Action 1

Action 1: Facilitate annual stakeholder meeting (Including EMS, SWCD's, CCBs, Engineer's Offices, Sanitarian Offices, NRCS, City Park and Rec, Iowa DNR, Wastewater Management Offices, Etc.)

Cooperation between agencies and organizations across political boundaries within the Upper Iowa Watershed is crucial to the success of this plan. Sharing information, technical assistance, collaborating on projects are all ways in which organizations can work together to implement the strategies outlined in this plan and ultimately make the Upper Iowa River Watershed more resilient.

Action 2

Action 2: Encourage agencies, organizations, departments and other partners to link online media and social media resources

In today's society, information moves quickly. Most organizations utilize multiple outlets to provide information to their members, constituents, or stakeholders. Organizations and agencies in the UIR Watershed cooperating to implement strategies outlined in this plan, it is imperative to share information, data, current events, or other news pertaining to the watershed through online resources, social media, and websites. This will encourage more widespread participation in programs and projects throughout the watershed.

Action 3

Action 3: Encourage local agencies and departments to refer to this plan

The UIR Watershed Resiliency Plan is intended to be a reference for local agencies and organizations looking for projects and resources to complete projects. Project ideas, activities, and locations are detailed in the plan to help public and private groups prioritize where to invest their resources most efficiently.
